**3-D MARKETING RECEIVES DoD FINAL APPROVAL ON DAGR RA-1 & RA-2 ANTENNAS**

Rancho Santa Fe CA

February 13th, 2014

After a two year period of intensive qualification via the DLA's SAR program including extensive FAT Environmental/EMI testing 3-D Marketing (002L0) has been officially approved by the DoD on both its DAGR RA-1 (NSN 5985-01-502-6692) and RA-2 (NSN 5985-01-521-1775) antennas.

This official DoD approval opens up sales opportunities for 3-D Marketing that were not previously available to us.

Our DAGR RA-1 and RA-2 antennas can now be added to our rapidly growing list of other DoD approved DAGR accessories.

With Antcom Corporation as the place of manufacture of our antennas, our customers are guaranteed to receive high quality and performance for years to come.

**ABOUT 3-D MARKETING**

3-D Marketing specializes in supporting the US and NATO Militaries with both standard and custom PLGR and DAGR accessories and has been doing so since 1996.

We added our DAGR RA-1 and RA-2 antennas to our product line in 2008.

We have sole source relationships with Antcom Corporation and X-Act Technologies, our two manufacturing partners, and both support our effort to deliver quality products to the WAR FIGHTER on a timely basis.
